INDEXES OF PRICES RECEIVED BY IOWA FARMERS FOR FARM COMMODITIES (Revised)

Prepared by Alfonso Drain and Jack L. Aschwege
Agricultural Statisticians

Prices received by farmers relate to average prices farmers receive for commodities they sell. Historically, price estimates have been defined as relating to the 15th of the month, and as such, have been based to a large extent upon price quotations during the five day period centered on the 15th of the month. The price data is used in constructing indexes and are collected and published by the Iowa Crop and Livestock Reporting Service. Systematic assembling and publishing of price data has made it readily possible to follow the movement of agricultural prices. Such price data do not lend themselves to short-time day-to-day observations but serve dependably in charting month-to-month and year-to-year changes.

The indexes of prices received by Iowa farmers for Iowa farm products were originally published in 1940. To keep the various index series comparable with the United States series, revisions were made in 1944. Originally the indexes were based on the August 1909-July 1914 base period with the quantity of sales and farm income for weighting purposes being the average of 1924 to 1929. The 1944 revision kept the same base period but weights were changed to 1935-1939. The 1953 and 1969 revisions continued with the same base period but weights were changed to 1937-41 and 1953-57 respectively.

The 1971 revised indexes of prices received by Iowa farmers are of the same general form as those of the 1953 and 1969 revisions and will bring Iowa indexes to a basis comparable with the revised United States indexes as to group coverages and weights for the 1910-14 base period.

Budget Bureau Circular A-46, Amendment 10 established 1967 as a new reference base period for Federal Government general purpose index numbers.

The Iowa Crop and Livestock Reporting Service now publishes prices received indexes monthly on both the 1910-14 and 1967 base. Tables showing revised index numbers for both base periods are supplied herewith. Those who need and wish to have a copy of the explanations and revision methods may obtain it by writing to the Agricultural Statistician, Federal Building, Room 855, 210 Walnut Street, Des Moines, Iowa 50309.

Budget Bureau Circular A-46, Amendment 10 established 1967 as a new reference base period for Federal Government general purpose index numbers.

The Iowa Crop and Livestock Reporting Service now publishes prices received tables monthly on both the 1910-14 and 1967 base. Tables showing revised index numbers for both base periods are supplied herewith. Those who need and wish to have a copy of the explanation and revision methods may obtain it by writing to the Agricultural Statistics Administration, Room 855, 110 Walnut Street, Des Moines, Iowa 50319.

INDEXES OF PRICES RECEIVED BY IOWA FARMERS FOR FARM COMMODITIES (Revised)

Prepared by Alfonzo Drain and Jack L. Aschwege
Agricultural Statisticians

Prices received by farmers relate to average prices farmers receive for commodities they sell. Historically, price estimates have been defined as relating to the 15th of the month, and as such, have been based to a large extent upon price quotations during the five day period centered on the 15th of the month. The price data is used in constructing indexes and are collected and published by the Iowa Crop and Livestock Reporting Service. Systematic assembling and publishing of price data has made it readily possible to follow the movement of agricultural prices. Such price data do not lend themselves to short-time day-to-day observations but serve dependably in charting month-to-month and year-to-year changes.

The indexes of prices received by Iowa farmers for Iowa farm products were originally published in 1940. To keep the various index series comparable with the United States series, revisions were made in 1944. Originally the indexes were based on the August 1909-July 1914 base period with the quantity of sales and farm income for weighting purposes being the average of 1924 to 1929. The 1944 revision kept the same base period but weights were changed to 1935-1939. The 1953 and 1969 revisions continued with the same base period but weights were changed to 1937-41 and 1953-57 respectively.

The 1971 revised indexes of prices received by Iowa farmers are of the same general form as those of the 1953 and 1969 revisions and will bring Iowa indexes to a basis comparable with the revised United States indexes as to group coverages and weights for the 1910-14 base period.

Budget Bureau Circular A-46, Amendment 10 established 1967 as a new reference base period for Federal Government general purpose index numbers.

The Iowa Crop and Livestock Reporting Service now publishes prices received indexes monthly on both the 1910-14 and 1967 base. Tables showing revised index numbers for both base periods are supplied herewith. Those who need and wish to have a copy of the explanations and revision methods may obtain it by writing to the Agricultural Statistician, Federal Building, Room 855, 210 Walnut Street, Des Moines, Iowa 50309.
